Isolated boundary controls: populations, 2048 shots per circuit
Pointwise intervals; device drift and circuit-context changes are not included
left: q49, bath q39 — pump
left: q49, bath q39 — loss
left: 72 resets, zero CZ gates
right: q95, bath q105 — pump
right: q95, bath q105 — loss
right: 72 resets, zero CZ gates
System excitation population
Collision count (categorical)
Ideal conditional collisions
Matching 1/0 baseline
